

## Worksheet 6: Audience evaluation

Devise questions for the audience to you will present your model and soundscape.

Responses to the questions will provide you with information about how well you communicated information about the evolution of a part of the universe.

Include 4–6 questions about:

- your presentation, the model, the soundscape
- the science facts and ideas you were aiming to communicate.

Use the prompts below as a guide. After you have devised the questions, prepare a survey sheet for audience members to complete.

Your questions need to be approved by the ‘target audience’ teacher, so this worksheet must be completed at least one week before the presentation.

**Question 1: [presentation]**

**Question 2: [model]**

**Question 3: [soundscape]**

**Question 4: [science facts and ideas]**

**Question 5: [interactivity – model/soundscape, audience/model, etc.]**

**Question 6: [anything else, if necessary]**
